

Download BarTender Label Format to Printer by "Export Printer Code Templeate | <u>TSC KP-100/KP-200" Feature</u>

For downloading label format to printer, BarTender does not support download True Type Font into the printer. So for the download label format, please do not use TTF font.

Note: Please use BarTender software V7.75 build 1909, Seagull driver 7.05-M-5 version and later versions for downloading the label format to printer.

In the following example, there are two prompt text fields (Text2, Text4 objects) are set to prompting for input from the keyboard. The other two barcode fields (Bar code 1, Bar code 2) are linked to the Text2 and Text4 respectively.
